

Let Nature Inspire Your Creative Spirit

March 25th 2017 - Special Earth Hour & Dark Moon Evening Class

Five Platonic Solids Meditation

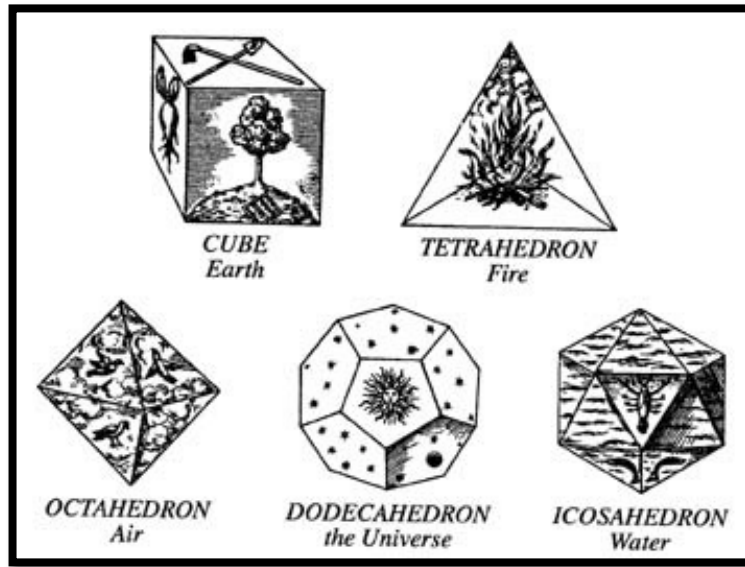

Image source: <http://faculty.humanities.uci.edu/bjbecker/exploringthecosmos/lecture2.html>

Explore the Wisdom of the Universe Through Geometry.

Five platonic solids are five unique geometric structures that have the faces of equal size, edges of the same length, one size of interior angles between faces, and when placed into a sphere, all the points of the forms will touch the sphere's surface.

Due to these unusual features, these platonic solids (cube, octahedron, tetrahedron, icosahedron, and dodecahedron) are described by geologist Gregg Braden as the geometric codes of creation.

It is believed that all the wisdom, knowledge, and experiences of the Universal Mind can be explored and utilized through the platonic solids. Each platonic solid is also linked with one of the five elements: water, earth, fire, space, and ether.

During this 60-minute session, our resident practitioner Watchararat Srichamroen (A), will explore together with you the power of the five platonic solids in a meditation session. Enjoy and have fun with the five platonic solids, and see what experience it brings you.

Time & Date of Special Class: March 25th 2017 from 8.30 – 9.30pm at Meditation Pavilion

Price: 500THB per person / Use one class pass

Please kindly reserve your space, maximum 20 guests.

For more information and reservation, please contact our Reception open daily from 9am – 9pm.

*Price is all inclusive of government taxes. Please note that no service charge is levied.
If you enjoy the service of our team, kindly leave them a gratuity at the Reception.*
